

About Us

TT Network Integration Asia Pte Ltd (TTNI-A) is an Information Technology Company based in Singapore and established in 2002. Our stakeholders include Toyota Tsusho Corporation, Toyota Digital Cruise, Inc., Toyota Communication Systems Co., Ltd., Toyotsu Syscom Corporation and Toyota Tsusho Asia Pacific Pte Ltd

Your Chosen One!

Our Expertise

TTNI-A started out as a developer in IT infrastructure, Warehouse Management System (WMS) and Supply Chain Management and we are proud to say that we have a solid foundation of technical ingenuity and system development has become one of our biggest strengths over the years. Today, we provide an extensive range of IT services such as Security Enhancement (through ZERO Data - A Data Protection Solution, Managed Security Services and Complimentary Security Check-ups), Infrastructure As A Service (IAAS), Cloud Migration Services and Applications services using Microsoft SharePoint & Workflow.

Our Vision

Committed to our clients, we envision to become the BEST and RIGHT IT Business Partner to deliver business value through innovative technology.

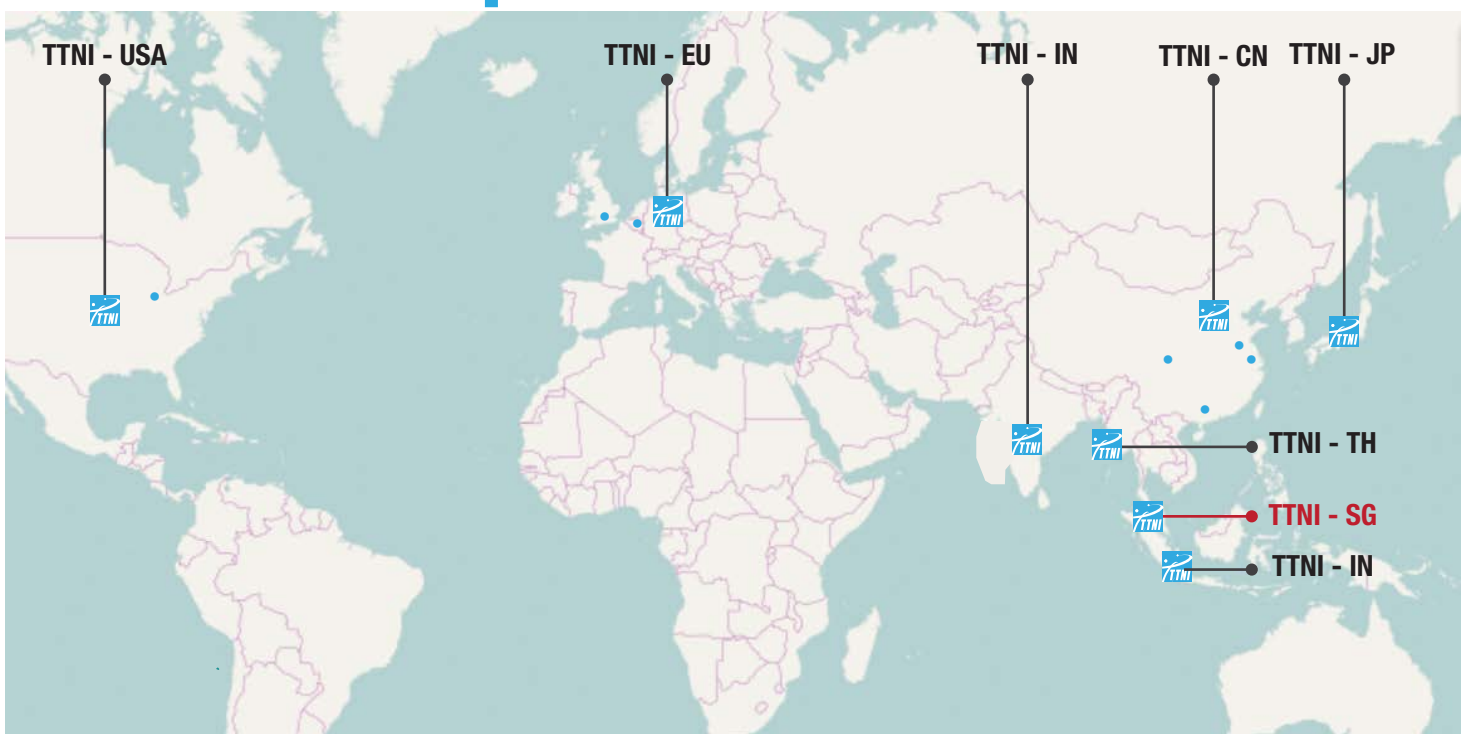

Our Clients

As a member of the Toyota Tsusho Group, we had the privilege to work with all Toyota Affiliates and have constantly delivered creative and outstanding work to meet the business objectives of our counterparts. As we are proud of our accomplishments, we would like to extend our services out of the Toyota Group.

Behavioural Guidelines

As a good corporate citizen, we will:
Implement open and fair corporate activities. Fulfill our social responsibilities, and conserve the global environment. Offer creativity, and provide added value. Respect people, and create an active workplace worth working in.

Cloud Migration Services

Cloud Migration Services

Migrating an enterprise's data and applications to the cloud includes a laundry list of considerations - from tools and costs to security

Applications – Microsoft SharePoint & WorkFlow

SharePoint

SharePoint allows people, teams and expertise to connect and collaborate. An application which is used for data storage, collaboration and for document management in rigorous enterprise environments. SharePoint is widely used for building sophisticated web apps, and useful when it comes to storing, sharing, collaborating and accessing data from multiple devices without restraint.

WorkFlow

Workflows are pre-programmed mini-applications that streamline and automate a wide variety of business processes. Workflows can range from collecting signatures, feedback, or approvals for a plan or document, to tracking the current status of a routine procedure.

Applications – ZERO Data A Simple Data Protection Solution

TTNI ZERO Data is a server hosted, Data Protection Solution. By centralizing endpoint infrastructure, organizations can realize lower costs through reduction in administration tasks, hardware requirements, and endpoint compliance exceptions.

ZERO Data allows data to be centralized and stored securely, and the data to be more effectively backed up.

There is no risk for Information Leakage when PC is lost or stolen.

Applications – Warehouse Management System

WMS

Warehouse Management System

Manage inventory, space, material handing equipment, labour, and transportation resources in real time to assure timely, error-free fulfillment, delivery, and visibility of order status throughout the supply chain.
